

Chicago, IL – August, 2010

Prospect City announced it has been engaged by Arrow Electronics to provide global pipelining for its senior talent across all divisions and global regions.

In addition to the continuous talent scan to support succession planning, benchmarking and recruitment, Prospect City will provide its database technology to support Arrow leadership and the Prospect City team.

“Pipelining has become a popular alternative for clients who want to approach talent benchmarking as a partnership among highly qualified recruiters, researchers and corporate management”, added Robert Stein, President of Prospect City. “It’s a win-win-win for us, our recruiter friends and for our clients.”

Prospect City is an infrastructure services provider to executive recruiting firms and corporate recruiting functions within large organizations. The company leverages all of these relationships to provide pipelining services to corporate clients on behalf of recruiters and researchers willing to work under this platform.

Arrow Electronics ([www.arrow.com](http://www.arrow.com)) is a global provider of products, services and solutions to industrial and commercial users of electronic components and enterprise computing solutions. Headquartered in Melville, N.Y., Arrow serves as a supply channel partner for over 900 suppliers and 125,000 original equipment manufacturers, contract manufacturers and commercial customers through a global network of more than 310 locations in 51 countries and territories.
