

Chicago, IL – December, 2010

Prospect City announced it has been engaged by Brookhaven National Laboratories to provide global pipelining and benchmarking senior talent.

In addition to the continuous talent scan to support succession planning, benchmarking and recruitment, Prospect City will provide its database technology to support BNL leadership and the Prospect City team.

“BNL is in a unique situation having to find great talent in an increasingly competitive market. Getting ahead of the need by getting to know top executives is a terrific way to lower risk and engage talent early”, added Robert Stein, President of Prospect City.

Prospect City is an infrastructure services provider to executive recruiting firms and corporate recruiting functions within large organizations. The company leverages all of these relationships to provide pipelining services to corporate clients on behalf of recruiters and researchers willing to work under this platform.

One of ten national laboratories overseen and primarily funded by the Office of Science of the U.S. Department of Energy (DOE), Brookhaven National Laboratory conducts research in the physical, biomedical, and environmental sciences, as well as in energy technologies and national security. Brookhaven Lab also builds and operates major scientific facilities available to university, industry and government researchers. Brookhaven is operated and managed for DOE’s Office of Science by Brookhaven Science Associates, a limited-liability company founded by Stony Brook University, the largest academic user of Laboratory facilities, and Battelle, a nonprofit, applied science and technology organization.
