

Chicago, IL – June, 2007

Prospect City announced it has been tasked with a ground-up technology build for a new startup firm located in Chicago. At this point the firm's identity will remain confidential until it officially opens its doors.

Prospect City is being asked to provide a Velvet Search Management Database, a VoIP telephone system, an initial website, email and desktop technology (configuration and installation).

"Our specialty is building search firms from scratch and improving the operations of existing firms. This is just another great example of how Prospect City is often the first thought of large-firm executive recruiters as they plan to open their new business" said Bob of Prospect City. "We hope to apply the lessons we've learned over the years to assist our new clients in building a highly profitable business based on efficiency of cost."

Prospect City expects the technology portion of the rollout to be completed within 30 days.

Prospect City is an infrastructure services provider to executive recruiting firms and corporate recruiting functions within large organizations. The company provides technology (database, VoIP phone systems, IM, websites and email) along with research, administration and accounting services to executive search firms.

UPDATE: Cavoure Advisors has officially opened its doors. Prospect City is proud to serve the organization's technology needs.
